

MAGLIFT RIM GUARD - Technical Specifications

Description

MAGLIFT (RIM GUARD) is specially engineered and designed for heavy duty forklifts used in industrial and logistic facilities. Its aggressive and robust tread pattern provide superior forward and lateral traction and excellent steering control. In addition, the wide center rib provides a low rolling resistance. The solid construction of MAGLIFT (RIM GUARD) features a high load capacity and an outstanding comfort, while its specially designed rim guard ensures protection against wheel damage. In addition, this tire shows excellent cut and chip resistance resulting in a longer tire life. MAGLIFT (RIM GUARD) reinforced structure eliminates slippage risk whilst the special bead shape simplifies mounting operations on the rim.
