

EARTHMAX SR 31 - Ficha técnica

Description

EARTHMAX SR 31 es un neumático radial All Steel diseñado específicamente para volquetes articulados y cargadoras de ruedas. Sus múltiples cinturones de acero ofrecen una resistencia y estabilidad extraordinarias, mientras que el patrón de bloques rígido no direccional es sinónimo de excelencia en tracción y maniobrabilidad, incluso en terrenos embarrados. Además de destacar por su comodidad de conducción, que es excelente durante operaciones de "carga y transporte" sobre superficies duras mejoradas, EARTHMAX SR 31 presenta un compuesto de banda de rodadura que lo hace especialmente resistente a los cortes y al calor. La estructura de carcasa radial también ofrece una menor resistencia al rodamiento, con un ahorro de combustible significativo.
