

RM 500 - Spécifications techniques

Description

RM 500 est un pneu radial avec ceintures d'acier, adapté pour les applications de récolte avec outillage agricole. Le pneu est équipé d'une carcasse robuste et un dessin particulier de la bande de roulement qui offrent une capacité de charge élevée en même temps qu'une excellente résistance aux coupures et lacérations. Grâce à son empreinte large, RM 500 assure une excellente répartition de la pression sur le terrain avec un compactage réduit du sol, en plus d'une traction exceptionnelle.
