

## SR 713 - Spécifications techniques

### Description

SR 713 est un pneu radial **All Steel** (Tout Acier) doté de la technologie VF pour engins agricoles. Ce pneu est caractérisé par une carcasse robuste avec ceintures en acier multicouches et par une bande de roulement au dessin à rainures multiples qui garantissent une faible résistance au roulement ainsi qu'une usure uniforme de la bande de roulement. Grâce à son empreinte large, ce pneu VF assure un compactage réduit du sol. SR 713 se distingue tant en termes de performances que par sa fiabilité, tout en offrant d'excellents niveaux de vitesse même sur la route.
